UI/UX AND DESIGN

UI/UX Design Document

Bellomassi Order-to-Delivery Management Platform

Document ID BM-UX-001

Document control

Field	Value
Document title	UI/UX Design Document
Document ID	BM-UX-001
Version	1.0
Status	Draft — for client review
Category	UI/UX and Design
Related module(s)	All modules
Document owner	UX Designer
Prepared by	Project documentation team (AI-assisted draft prepared from source-code analysis)
Reviewed by	*Pending — not yet reviewed*
Approval	*Not approved — awaiting client review (no approval has been given)*
Created date	2026-11-12
Last updated date	2026-11-12

> **Status labels used in this document:** VERIFIED (confirmed in the current source code or existing documents) · PROTOTYPE (works in the React/LocalStorage prototype with mock or simulated behaviour) · PROPOSED (recommended production design, not built) · PENDING CONFIRMATION (needs a client decision) · NOT IMPLEMENTED · NOT VERIFIED.

Purpose

Describe the user experience of the Bellomassi platform — users, principles, layouts and key journeys — as built in the prototype and as proposed for production.

Scope

Office web app, Driver app and Customer app. Current UI is VERIFIED from the prototype; production changes are PROPOSED.

Definitions

Other terms: see **BM-GLO-001** (Project Glossary).

1. Users and their main jobs

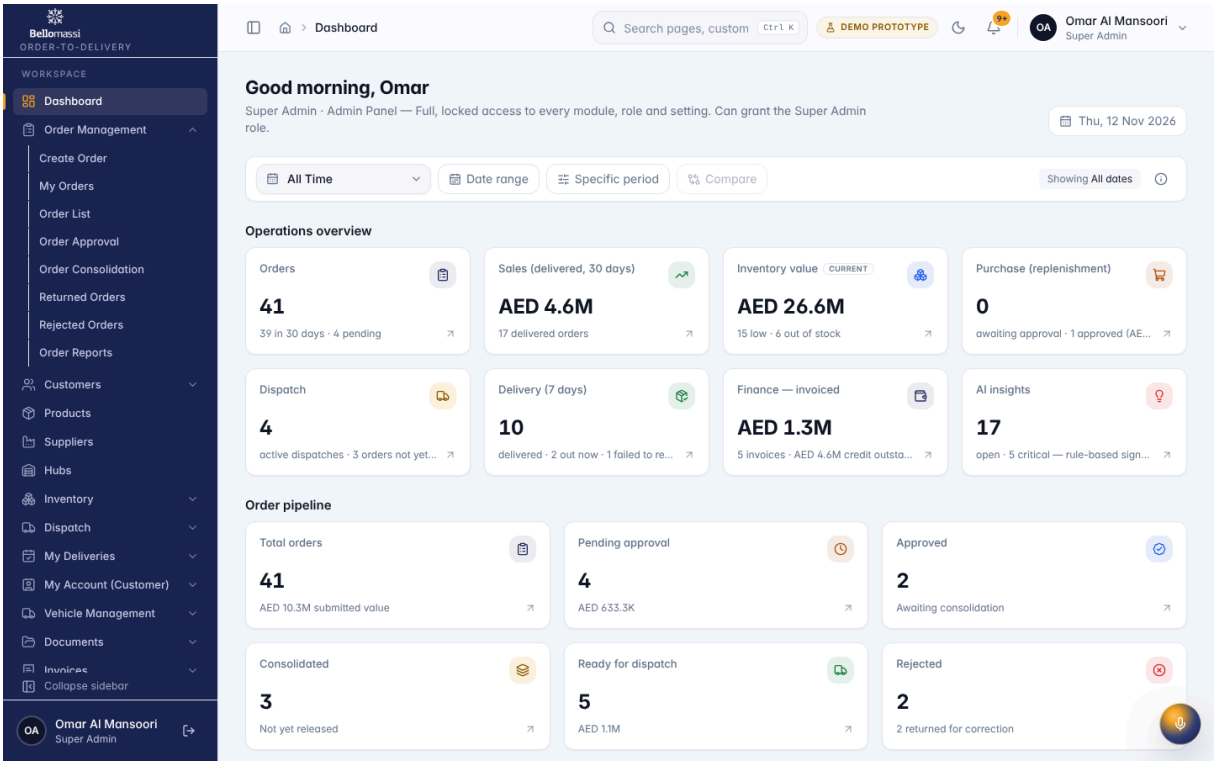

User	Device	Main jobs	Landing screen
Salesman	Laptop / tablet	Capture and submit orders, follow up returns	Dashboard
Sales Manager	Laptop	Approve, return or reject orders; watch credit	Dashboard → Order Approval
Customer Service	Desktop	Verify and consolidate approved orders	Dashboard → Consolidation
Dispatcher	Desktop (large screen)	Plan by zone, assign driver and vehicle, confirm dispatch, monitor, review exceptions	Dashboard
Driver	Phone	See today's stops, navigate, arrive, OTP, POD, delivery note	Driver Today
Customer	Phone	Order from catalogue, track, view delivery notes and invoices	Customer Home
Finance	Desktop	Invoices, credit position	Dashboard
Admin / Super Admin	Desktop	Users, roles, settings, master data, audit	Dashboard
Warehouse / Inventory / QA	Desktop / tablet	Stock, scrap, inspections, documents	Role dashboard

2. Design principles (VERIFIED in the prototype)

1. **One record, one status** — every order and delivery shows its status badge and timeline.
2. **Role-first** — the menu, dashboard and landing page change by role; users see only what they can act on.
3. **Queues over searches** — work screens are queues (pending approval, ready for dispatch, exceptions).
4. **Explain the blocker** — checks (credit, stock, documents) are shown before the action, with the reason.
5. **Honest prototype** — demo markers (DEMO PROTOTYPE, DEMO GPS, demo mode for email / WhatsApp) show what is simulated.
6. **Mobile for the field** — driver and customer apps are thumb-friendly single-column layouts with bottom navigation.

3. Layouts

Layout	Structure	Screenshot
Office (AppLayout)	Collapsible grouped sidebar, header with breadcrumbs, global search, theme, notifications, profile	UX-DASH-SA
Driver (DriverLayout)	Navy header, cards, bottom navigation (Today, Deliveries, Route, Completed, Profile)	UX-DRV-DASH
Customer (CustomerLayout)	Header, cards, bottom navigation (Home, Catalog, Cart, Orders, Account)	UX-CUS-DASH
Sign-in	Split screen (office) / mobile card (driver, customer) with demo account selector	UX-LOGIN

4. Key journeys

Journey	Screens (in order)	Spec
Create and submit order	Create Order → Preview → Submit → My Orders	UX-ORDER-CREATE, UX-MY-ORDERS
Approve order	Order Approval queue → Approval detail (6 checks) → Approve / Return / Reject	UX-APPROVAL, UX-APPROVAL-DETAIL
Consolidate	Consolidation queue → verify → Ready for dispatch	UX-CONSOLIDATION
Plan and dispatch	Ready Orders → Planning (zones) → Create dispatch → Confirm	UX-READY, UX-PLANNING, UX-DISPATCH-CREATE
Deliver	Driver Today → Delivery → Navigate → Arrive → OTP → POD → Delivery note	UX-DRV-DELIVERY, UX-DRV-ROUTE
Track	Delivery Tracking / Live Tracking; customer tracking	UX-TRACKING, UX-LIVE

Journey	Screens (in order)	Spec
Review exception	Delivery detail → return stock / re-queue	UX-DELIVERY-REVIEW
Customer order	Catalog → Cart → Submit → Orders → Track	UX-CUS-CATALOG, UX-CUS-CART

All screen specifications are in **BM-UX-005** (Screen Specifications); the full screen list in **BM-UX-004** (Screen Inventory).

5. Known UX gaps

ID	Gap	Label
UXG-01	Zone planning is a list / filter view, not the drag-and-drop board described in the SOW	PARTIAL — PENDING CONFIRMATION
UXG-02	Live tracking uses DEMO GPS, not real device positions	PROTOTYPE
UXG-03	Driver app is a responsive web app, not a native React Native app (no background GPS, push notifications or offline mode)	NOT IMPLEMENTED (native)
UXG-04	Address and phone formats are India-style (pincode, +91) while the company profile is Dubai / AED	PENDING CONFIRMATION
UXG-05	No usability testing with real users has been carried out	NOT VERIFIED
UXG-06	Arabic / RTL support not present	NOT IMPLEMENTED
